Question: Please explain why you would or would not recommend this instructor to a friend.

Response Rate: 60.00% **(6** of **10)**

1   just follow the book and youll be fine

2   easy grade

3   The course is open book on exams. She does a fairly good job of explaining concepts.

4   She explains each part of the course very nicely and she goes slowly so everyone can understand.

5   Jordan's the best. She's her own goofy person, is really approachable, and is willing to help 10x. She really loves her job and knows what she's talking about.

6   If you are trying to learn and really understand the concepts of statistics and looking to major in the this subject then this would be the class for you. I wouldn't recommend this instructor if you are not willing to go to class or pay attention.

Question: What, if anything, could the instructor have done to improve this class?

Response Rate: 60.00%   (**6** of **10**)

1   nothing . i like this class

2   made easier slides

3   The instructor made a couple of mistakes that got me confused between lecture and lab. The instructor could explain some things in more of a simpler way. Some people were more elderly and some people needed a better understanding to things that were explained.

4   Sometimes she goes a bit too slow for the lecture when explaining some stuff that I think were fairly straightforward.

5   Nothing, everything was done fairly well.

6   Amount of questions on test.
